SUMMARY

Security operations candidate with 12 years at Walmart's first fully dot-com fulfillment center, including 10 years as the site's collateral-duty Systems Operator handling Active Directory identity lifecycle, endpoint support, and incident escalation in a 24/7 operation. That work runs on the same loop an MSSP SOC does: triage against a clock, document everything, escalate cleanly, and explain the problem to the person on the other end in terms they can act on. Hands-on SOC training through Antisyphon (John Strand) and the TryHackMe SOC Level 1 path covering SIEM investigation, network traffic analysis, endpoint forensics, and MITRE ATT&CK mapping. B.S. in Cybersecurity (3.91, Summa Cum Laude) and CompTIA Security+.

PROFESSIONAL EXPERIENCE

Walmart Inc. | PHL2 Fulfillment Center, Bethlehem, PA

Jan 2014 – Present

Systems Operator (Collateral Duty)

Jan 2016 – Present

- Manage the Active Directory identity lifecycle for a 300+ associate site: provisioning, deprovisioning, role-based access requests, password resets, and MFA enrollment, applying least privilege on every change.
- Support 200+ endpoints (Windows workstations, RF scanners, thermal label printers, kiosks) in a 24/7 operation; triage issues, resolve at site level, and escalate to enterprise support with clear handoff notes, including through Q4 peak.
- Perform recurring compliance reviews: verify network and technical cabinets are secured with pass/fail documentation, maintain asset mapping and inventory, and report results to site leadership.
- Pull building performance data for home office goal-setting and build weekly and 4-week per-associate rollups used for accountability decisions.

Continuous Skills & Development Leader

Aug 2023 – Present

- Own access-control governance and technical training for 25+ role types across 300+ associates; built a 3-tier certification standard (written test, practical validation, formal sign-off) that gates access to production systems.
- Migrated 20+ roles to Active Directory group-based access, replacing ad hoc individual grants with a role model that can be audited.
- Authored 20+ associate work instructions (AWIs) standardizing how critical processes are performed and verified.
- Self-initiated and built an internal tracking tool on Walmart's AI coding platform that alerts when associates fall behind expected progression and captures time-study data to pinpoint the process step causing the gap.
- Monitor performance, safety, and quality compliance in Power BI and turn trends into root cause analysis and targeted retraining; redesigned the role-based training matrix, cutting facility turnover from 117% to under 10%.

Shipping Operations Lead

Mar 2019 – Aug 2023

- Site subject matter expert for Labels Not Invoiced (LNI) anomalies: investigated up to 7,000 shipment exceptions per peak period on a 3-day escalation cadence, isolating root cause and routing each to the right owner.
- Ran outbound shipping under a 2-hour SLA while maintaining DOT and hazmat compliance across four peak seasons.
- Wrote the facility's first end-to-end technical handbook for the Shipping Clerk role, later adopted network-wide.

Area Manager, Order Filling Lead, Shipping Clerk, Order Filler

Jan 2014 – Feb 2019

- Led a Kaizen-driven process redesign as Area Manager that doubled throughput from 200 to 400 units per shift while reducing process headcount from 20 to 8.

Earlier Experience

2006 – 2016

- **LAS & Associates, Junior CAD Draftsman / Computer Consultant (2006 – 2010):** Terminated Cat5/5e/6 structured cabling in new construction, built PCs from components, and troubleshooted customer computer and network issues.
- **Lehigh Valley Rent-A-Chef, Co-Founder (2010 – 2016):** Ran a catering business end to end, including client contracts, invoicing, regulatory compliance, and day-of issue resolution.

SECURITY PROJECTS

Security Findings Translator | FastAPI, PostgreSQL, Docker, Render

Deployed

- Converts AWS GuardDuty, Security Hub, and Nessus output into prioritized, plain-language guidance for seven audiences, from executives to engineers, ranked with CVSS, EPSS, and CISA KEV.

- Ran an OWASP review of the app and fixed a scoring flaw so KEV-listed findings can never fall below a minimum priority.

M365 IAM Lifecycle Automation | PowerShell, Microsoft Graph, Entra ID

GitHub

- Joiner/mover/leaver scripts against a live Entra ID tenant with timestamped audit logging, plus a documented RBAC permission model that maps each script's blast radius.

Home SOC Lab | Proxmox, VirtualBox, Kali Linux, Snort, Wireshark

Ongoing

- Segmented VLAN lab: generate attack activity against victim VMs with Nmap and Metasploit, then detect it through Snort signatures and manual pcap review; analyze real samples from malware-traffic-analysis.net.

HANDS-ON SOC TRAINING

- **Antisyphon, SOC Core Skills in the Age of AI (live with John Strand, 2026):** tcpdump, Wireshark, DeepBlueCLI, Volatility memory forensics, RITA/AC-Hunter network threat hunting, Velociraptor hunts and artifact collection, OWASP ZAP. Also completed Preparing IR for AI Incidents; Blue Team Master Class in progress.
- **TryHackMe SOC Level 1 Path (100+ labs):** Splunk and Elastic SIEM investigations, Windows Event Logs and Sysmon, phishing header analysis, Snort/Suricata rule tuning, MITRE ATT&CK mapping, end-to-end triage simulations. Top 5% of 7M+ TryHackMe users.
- **National Cyber League:** PCAP and file-system forensics, log analysis, password cracking, OSINT, and enumeration. 2026 Embedded CTF participant.

SKILLS

Production experience: Active Directory identity lifecycle, RBAC and least privilege, MFA enrollment, access governance, Windows endpoint support, incident triage and escalation under SLA, root cause analysis, compliance documentation, technical writing, cross-level communication

Lab and training: Splunk, Elastic, Wireshark, tcpdump, Snort/Suricata, Sysmon, Windows Event Logs, DeepBlueCLI, Velociraptor, Volatility, RITA, MITRE ATT&CK, Nmap, Metasploit, Linux CLI, PowerShell, Microsoft Graph, Entra ID, Docker, PostgreSQL, CVSS/EPSS/KEV

CERTIFICATIONS

CompTIA Security+ (SY0-701) | EC-Council Digital Forensics Essentials (DFE) | Google Cloud Cybersecurity Professional Certificate | Palo Alto Networks Cybersecurity Professional Certificate | Microsoft SC-500 (exam scheduled Oct 2026)

EDUCATION

B.S. Cybersecurity, Data Analytics Concentration, Southern New Hampshire University, May 2026 | 3.91 GPA, Summa Cum Laude
Business Administration coursework, Kutztown University of Pennsylvania, 2007 – 2010

COMMUNITY

BSides Harrisburg | National Cyber League (CyberSNHUpers leadership) | Trace Labs | CSA Lehigh Valley | Simply Cyber | Antisyphon
